## DETAILED ACTION

Applicant's RCE filed on 11-12-04 has been received and entered in case. Claims 21-40 are pending.

### *Double Patenting*

1. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

2. Claims 21-40 are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1-5 of U.S. Patent No. 6,614,289 (hereinafter "289"). Although the conflicting claims are not identical, they are not patentably distinct from each other because they all call for the same inventive device. For instance, a first means for normally not conducting (claim 21); a switching device normally in an off state (claim 25) and a normally off active device (claim 31) are essentially referred to a normally off transistor as recited in claim 1 of "289". Similar, a second means for starting conduction (claim 1) and a starter device (claims 25 and 31) are essentially referred to a first starter of claim 1 of "289".

Art Unit: 2816

As to 0.4volts limitation of claims 26, 35, 38 and 40 to switch a transistor, it is seen as inherent operational characteristics of a transistor.

***Response to Arguments***

3. Applicant's arguments, see Remarks and Arguments, filed 11-12-04, with respect to the Rejection under 35 USC 102 have been fully considered and are persuasive. The rejection of claims 21-40 under 35 USC 102 has been withdrawn. However, Double Patenting Rejections of claim 21-40 are maintained as indicated above.

***Conclusion***
